SYNESTRY
PAPER CONVERTING SOLUTIONS

COMPANY PROFILE

Paper bag lines running at target – on site, worldwide.

Machine ramp-up, service and consulting for paper bag converting and printing lines. Hands-on support from a specialist with 30 years of field experience in 80 countries.

30 years
field experience in converting & printing

80 countries
on-site assignments on all continents

1 contact
from ramp-up to stable production

Services

01
Machine ramp-up
Commissioning support and ramp-up of new or relocated lines – from first bag to stable target output, with daily reporting.

02
Service & troubleshooting
On-site and remote support: root cause, settings, mechanical, process and print issues.

03
Process optimisation
Output, waste, format changes and print register – measured on the machine, improved with your team.

04
Operator training
Practical training for operators and maintenance staff at the machine, documented for the shift teams.

05
Consulting
Line concepts, investment decisions, specifications and acceptance tests – from someone who has started up the machines.

06
Printing
Inline and stack flexo printing for bag production: set-up, register, colour and print quality on paper.

SOS BAGS | MAILER BAGS | CARRIER BAGS | BAGUETTE & FOOD BAGS | INLINE & FLEXO PRINTING

How an assignment runs

1. Assess

Machine, product and target – what is the gap and why.

2. Plan

Scope, schedule and resources agreed in writing before travel.

3. On site

Hands-on at the line with your operators. Daily timesheet and status.

4. Hand over

Service report with settings, results and open points.

Why Synestry

Both perspectives

Three decades on the machine-builder side, plus day-to-day responsibility for production in a paper bag plant.

Documented results

Settings before / after, KPIs at handover and open points – your team can reproduce what was achieved.

Transparent billing

Hours on a timesheet confirmed by you on site; travel allowances per official BMF rates or as agreed.

One contact

From the first enquiry to stable production – no hand-over between sales, service and training.

Juergen Schlautmann

MANAGING DIRECTOR · CONVERTING & PRINTING SPECIALIST

> "A new line is only finished when it runs at target – with your own team at the controls."

For three decades I have commissioned, serviced and optimised paper bag converting and printing lines – in plants of every size, in 80 countries on all continents.

With Synestry I bring this experience directly to manufacturers: ramp-up of new machines, support when output or quality falls short, and consulting before you invest.

Assignments are billed by the hour or day on the basis of a confirmed timesheet. Rates and availability on request.
